DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6 and 12-16, drawn to an electroluminescence display, classified in class 313, subclass 501.
 - II. Claims 7-11 and 17-20, drawn to a pattern layout method for an electroluminescent display, classified in class 716, subclass 10.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case as opposed to a length thereof in another direction being shorter than or equal to a corresponding length of the pixel region, the length thereof in another direction could be longer than a corresponding length of the pixel region.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2879

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
